KRISHILINK

Bridging Agriculture & Technology for a Stronger India

The Crisis Facing Indian Farmers

Challenges that sparked KrishiLink

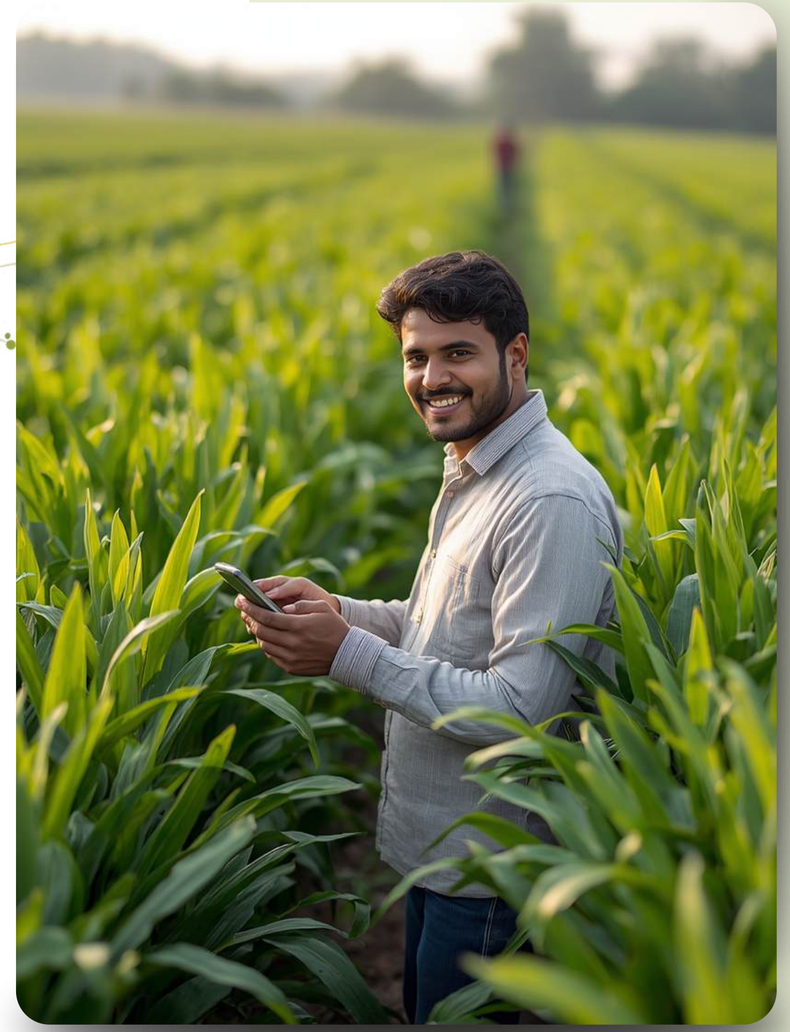

📊 140 Million farming households in India
📉 Only 20–30% of consumer price reaches farmers
💸 Rs. 90,000 Crore lost annually in post-harvest losses

Multi-layer middlemen chains drastically reduce farmer profits. Lack of direct market access limits earnings potential. Farmers have no real-time tools for weather or disease management.

A Unified Digital Platform for Farmers

What is KrishiLink?

Farmer-to-Buyer Marketplace

Direct listings with fair price discovery — no middlemen. Farmers connect straight to buyers for better margins.

AI Crop Disease Checker

Upload a leaf photo for instant AI diagnosis and treatment advice to protect your crop yields.

Hyperlocal Weather Insights

District-level forecasts for all 727 Indian districts, powered by the Open-Meteo API for precision planning.

AI Chatbot + MSP Rates

Agronomic guidance, government scheme info, and MSP rates for 23 crops.

Platform Flow

1. **Farmer Registers**
   Creates a profile with location and contact details.

2. **Lists Produce**
   Farmer adds produce listings to the dashboard.

3. **Buyer Browses & Connects**
   Verified buyers and wholesalers discover fresh listings and initiate direct contact.

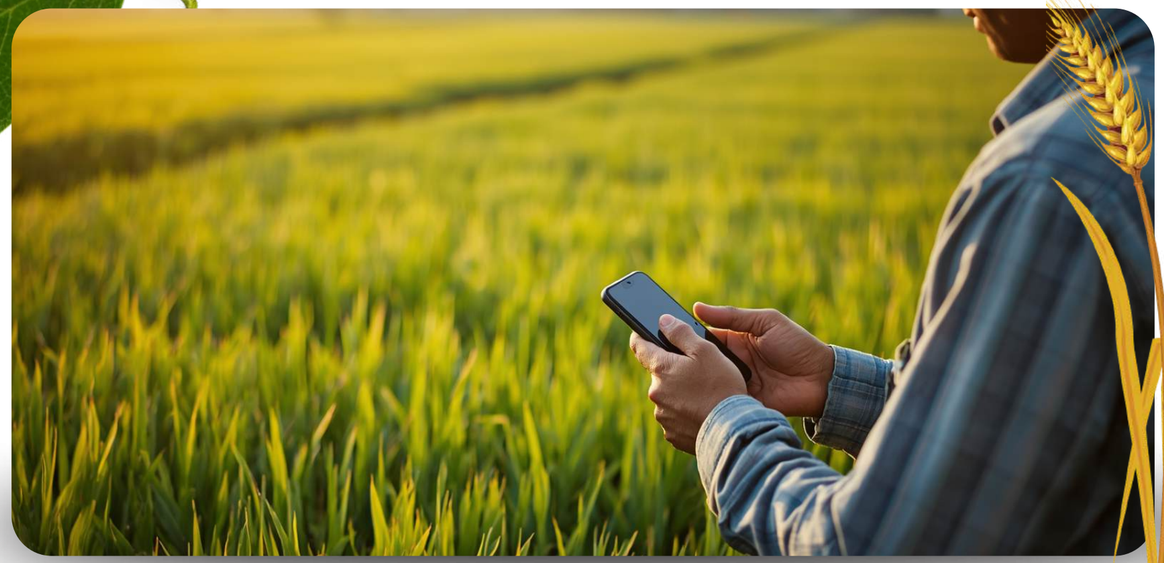

4. **Direct Transaction Completed**
   Farmer and buyer transact without middlemen — fair price, full transparency.

Underpinning every step:
AI crop diagnostics and Hyperlocal weather data work in the background to support smarter decisions.

KrishiLink Platform Capabilities

Core Features

Farmer-to-Buyer Marketplace

Direct produce listings with fair price discovery. No middlemen — farmers connect directly with buyers for maximum profit.

Hyperlocal Weather Insights

District-level forecasts covering all 727 Indian districts. Powered by Open-Meteo API for real-time accuracy.

AI Crop Disease Checker

Upload a leaf photo for instant AI-powered diagnosis and treatment advice to protect crop yields.

AI Chatbot + MSP Rates

Agronomic guidance, government scheme info, and MSP rates for 23 crops — all in one place.

KrishiLink · UN Sustainable Development Goals

Aligned with UN SDGs

SDG 1 — No Poverty

Direct farmer-to-buyer sales eliminate middlemen, ensuring farmers receive fair prices and raise household incomes sustainably.

SDG 2 — Zero Hunger

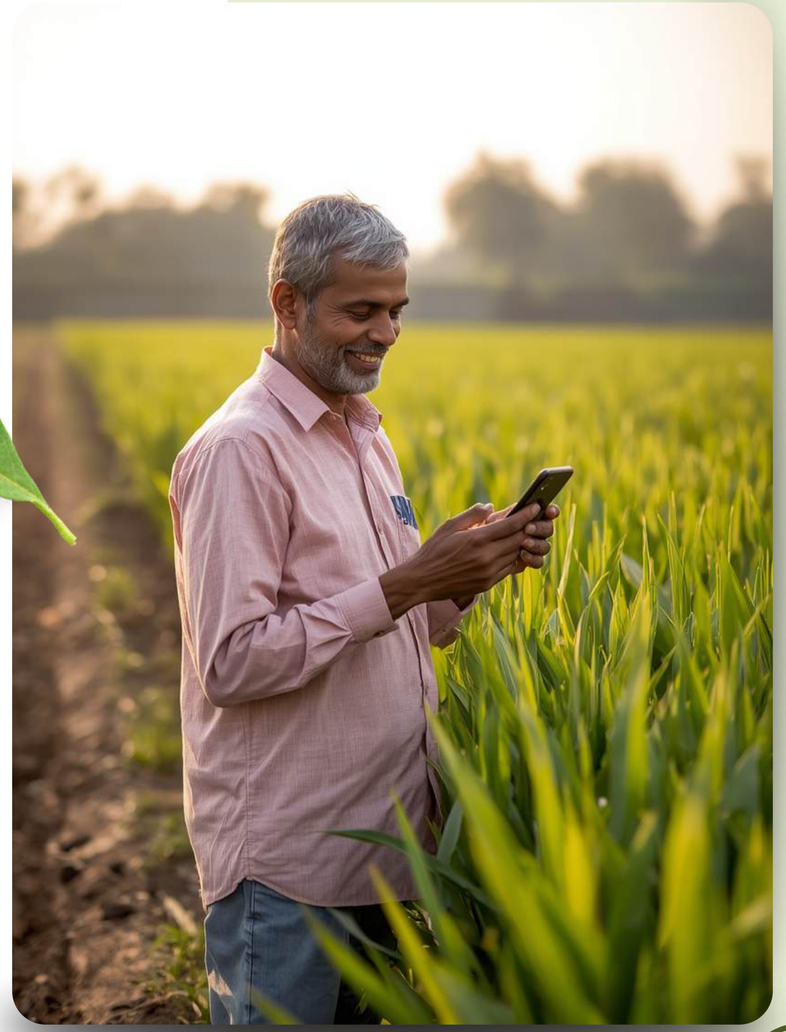

AI-powered crop disease detection protects yields early, reducing food loss and strengthening food security across rural India.

SDG 8 — Decent Work & Growth

KrishiLink empowers farmers as direct traders in the digital economy, creating dignified livelihoods and economic participation.

SDG 9 — Innovation & Infrastructure

AI tools, cloud infrastructure, and Open-Meteo APIs modernise agriculture, bringing cutting-edge technology to rural communities.

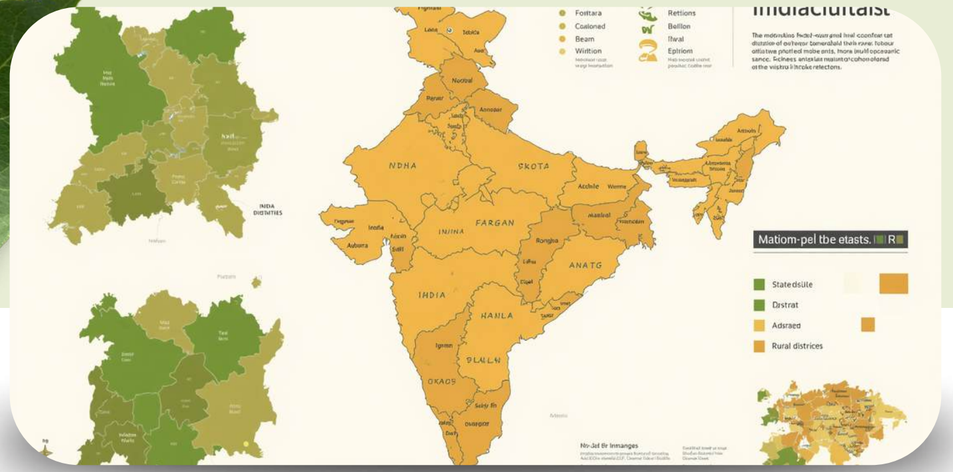

Who We Serve

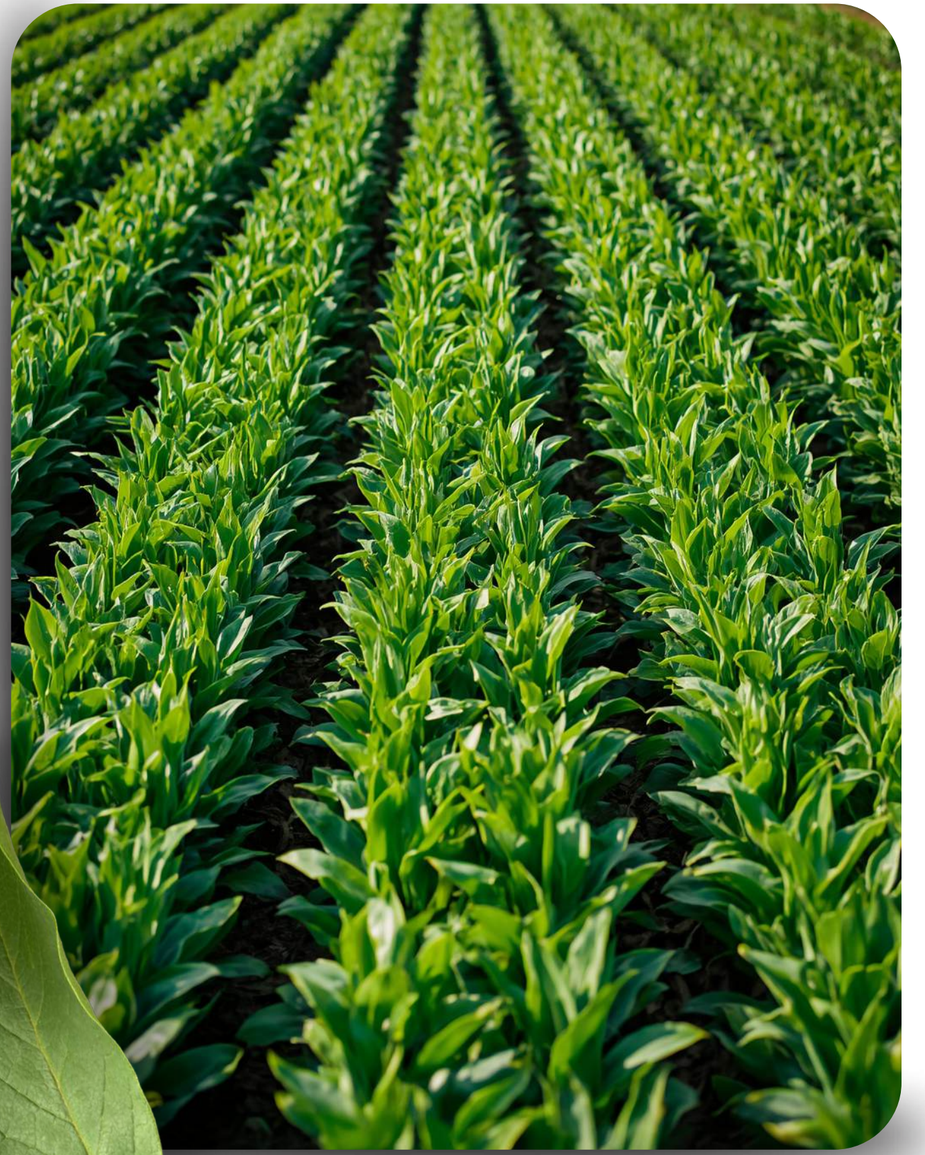

KrishiLink is built for the heart of rural India — spanning all 727 districts across the country.

- Indian smallholder farmers seeking fair prices and direct market access
- Agricultural buyers and wholesalers looking for quality produce
- Agri-input dealers connecting with farming communities

From the plains of Punjab to the fields of Tamil Nadu, KrishiLink bridges the gap between farmers and markets — empowering every grower, regardless of scale.

Impact We Create

Economic Impact

Higher farmer margins through direct sales. Reduced distress selling with fair price discovery. MSP-based pricing ensures minimum income.

Agricultural & Digital

Early disease detection protects yields. Weather-informed harvesting cuts post-harvest loss. Simple multilingual interface bridges the rural digital divide.

React + TypeScript

Fast, component-based frontend with type-safe development

Supabase

Serverless Postgres database with real-time sync & auth

Cloudflare Pages

Zero cold-start global deployment for rural connectivity

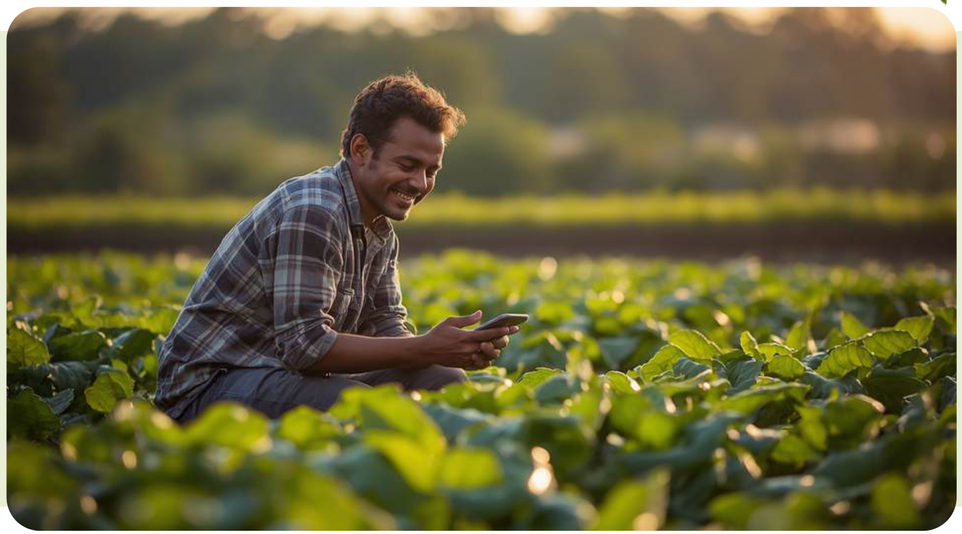

Open-Meteo API

Hyperlocal weather data for 727 Indian districts

KrishiLink

Built With Modern Technology for Modern India

KrishiLink aims to put fair prices, smart tools, and market power directly in every farmer's hands.

SDGs: No Poverty · Zero Hunger · Decent Work · Innovation
